## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1,3,5,10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Biver. Regarding claims 1,3,10 and 11, the reference discloses main body 1,2 housing a watch movement as shown, bezel 4 surrounding the display body, bayonet structure including first projections 8-10 defining recesses 30-32 on main body 1,2, second projections 11-13 defining corresponding recesses therebetween on the inner circumference of the bezel for removably mounting the bezel to body 1,2. The bezel is further rotatable unless locked by means 6. With respect to claim 5, Biver further discloses groove 21 for accommodating elastic member 22 urging bezel 4 away from main body 1,2.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Biver, as applied to claim 1, in further view of Eschle. . Biver further suggest placement of decorative items on bezel 4 at col. 4, line 6. The Eschle reference teaches placement of marks on a rotatable bezel including mark hole 12 for alignment with the watch case. It would be obvious for one skilled in the art to provide such marks in the Biver reference for aligning the bezel with the case.

3. Claims 2 and 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 4, 12-15 and 18-19 allowed.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
